

LIT Fireplaces

Made from natural pumice, sourced from the Hekla Volcano in Iceland.

Available in 3 sizes and delivered in a complete packaged DIY solution.

The LIT Fireplace is the ideal solution for outdoor living.

This stunning focal point for any outdoor setting is available in 3 sizes and is delivered in a complete DIY packaged solution.

The natural volcanic pumice [sourced from the Hekla Volcano in Iceland] gives this outdoor fireplace all the insulation needed to have a safe and spectacular centre-piece in any garden. The relatively small footprint also means that it can be placed against any wall, even in small gardens or yards, where space is at a premium.

The DIY kit includes the chimney blocks, the mortar for assembly, firebricks and also firebrick mortar and a render to either seal the joints or give an entire rendered finish.

The Patio 500 model comes with a log retainer and barbecue grill [additional log stores are available as extra]. The Garden 950 and Ranch 1200 models can have a log store as an additional extra.

This makes the LIT Fireplace the only choice for outdoor heating and living, from the leading experts in chimney solutions.

LOG RETAINER & BARBECUE GRILL FREE WITH PATIO 500 MODEL!

PATIO 500

This version can function in any size garden as you can have it with or without the side log stores.

The 500 model comes with a FREE Log Retainer and a Grill to allow it to become a superb barbecue, as well as a stunning Outdoor Fireplace.

Additional chimney blocks can be added to increase the height.

Opening 510mm w x 540mm h depth is 440mm

Weight 460kg
1 Pallet Delivery

We recommend a 100mm thick concrete (or similar material) base as the completed build is very heavy and could sink or slant if the base is not strong enough.

GARDEN 950

Our most popular model as it's easy to build and fully load bearing, like all the LIT Fireplaces. Our mid-range model is ideal for all garden sizes and can be freestanding, raised, or built against a wall.

Additional chimney blocks can be purchased to increase the height

Opening 940mm w x 720mm h depth is 640mm

Weight 960kg
1 Pallet Delivery

We recommend a 100mm thick concrete (or similar material) base as the completed build is very heavy and could sink or slant if the base is not strong enough.

RANCH 1200

Our largest LIT Fireplace is a spectacular addition to your outdoor living space.

A wide open fireplace built with volcanic pumice, makes this the envy of any garden lover.

Additional chimney blocks can be purchased to increase the height.

Opening 1180 w x 720mm h depth is 640mm

Weight 1100kg
2 Pallet Delivery

We recommend a 100mm thick concrete (or similar material) base as the completed build is very heavy and could sink or slant if the base is not strong enough.
